DETAILED ACTION

Claims 1-5 are presented for examination on the merits.

Continuing Data

The instant case is a divisional of case serial no. 10/057214 , now U.S. Patent No. 6,716,599 which is a continuation of case serial no. 09/841552, now U.S. Patent No. 6,552,171. It is suggested that Applicants update the status of the instant file at page 1, line 1, of the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-5 are rendered vague and indefinite because it is unclear how “an aqueous acidic dispersion of said jojoba meal” is formed. Is it formed upon heating said jojoba meal or is it a starting material for the claimed process? The metes and bounds of the claims can not be determined.

Further, claim 3 is unclear for the recitation of “the provide for solids level content” because the phrase is grammatically indefinife. It is suggested to change “the” to –to—and insert –a—before “solids level content” .

The claims appear to be free of the prior art.

The references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
